JOHNS HOPKINS OFFERS FELLOWSHIPS IN RESEARCH TRAINING IN TRAUMA & VIOLENCE

The Johns Hopkins Schools of Nursing (JHSON), Medicine (SOM), and Public Health (BSPH) are pleased to announce a Pre- and Post-Doctoral Fellows program for students interested in the causes, health and behavioral effects, and prevention of lifetime trauma and violence.

The fellowships are part of a new (T32 HD094687) grant from the National Institutes of Health, National Institute of Child Health & Development (NICHD) 2018-2023, Interdisciplinary Training in Trauma and Violence. The goal is to train nursing, public health and medical scholars in the science of risk factors, neurophysiological, developmental, physical and mental health sequelae, and interventions across the translational research continuum for lifetime experiences of trauma and violence.

THE FELLOWS WILL BE EDUCATED IN:

- Community, family, antenatal, youth and collective violence, suicide, violence against childbearing women and children
- Social, ethnic and cultural influences on trauma and violence etiology and outcomes
- How health inequities in policies related to violence and access to care can result in more severe physical and mental health outcomes for ethnic minority and marginalized populations
- Culturally tailored interventions and RCT (pragmatic trials) and other strategy evaluations
- Multiple methods approaches to violence related research, including using “big data” and combining qualitative and quantitative data and/or physiological data
- Optional foci: HIV/Violence Interface, Substance Abuse/Violence Interface, Global Violence

THE GRANT SUPPORTS:

- Two pre-doctoral fellowships in Nursing
- Three in Public Health each year
- Two post-doctoral fellowships in the School of Medicine, JHSON, or BSPH Departments of Health Policy & Management, Population & Family Reproductive Health, Health Behavior and Society

Pre and Post-doctoral fellowships include full tuition plus the NIH standard pre- or post-doctoral stipend and an allotment for research related expenses. Fellows are advised by one of the Core Faculty in the department/school of their fellowship and co-advised by a Core Faculty member in one of the other two schools. The fellowships are for full time study during the academic year and include working as a research assistant approximately 20 hours per week on a funded violence related research project. A trauma and violence research seminar is jointly taught by the entire interdisciplinary faculty and taken by all Fellows. Application for pre-doctoral students is through the SON for nursing students, and the BSPH for public health students (with a cover letter indicating you are interested in the Violence & Trauma Research pre-doctoral fellowship). The goal statement should include the focus area of violence related research.

Post-doctoral applicants should apply at the following link: nursing.jhu.edu/postdoc
